Natural Organic Solutions

Application of Haifa Multicote Controlled Release Fertilisers

Turf / Lawns

MC (2) 42 % N (Nitrogen) 42.0.0 (2 month release)

MC (4) 42 % N (Nitrogen) 42.0.0 (4 month release)

Packaging 20kg Bag

Suggested application : 25grams/ square meters (approx. 1 handful)

250kg / hectare supplying 105 kg N / ha.

Apply in early Spring (September).

Re-apply after release period if necessary.

Existing turf , apply over surface.

New turf apply before planting, place Multicoat 5 cm deep in soil for best results.

Combination option:

Apply 25g/ square meter of MC (4) and 25g/ square meter of Avison organic pelletised chicken manure.

Garden Beds, Vegetable Beds

MCA (4) Juvenile N 24.6 % , P 2.8 % , K 10.8 % . 24.6, 2.8, 10.8 (4 month release)

Packaging 25kg Bag

Suggested application : 50grams/ square meter (approx. 2 handfuls)

500kg / hectare supplying 120kg N, 14kg P, 54kg K.

Apply in early Spring (September).

Work into soil 5 cm deep for best results and 10cm away from plant stems, close to root zone.

Large Trees 100 grams/ tree around root zone dug 5 cm into soil. (> 4 m) once per year

Medium Trees 75 grams/ tree around root zone dug 5cm into soil. (2-4 m) once per year

These are suggested application rates for general maintenance.

However if a soil analysis is done a specific programme can be recommended according to soil requirements.
